Station de base 5G de la societe Oman Hybrid Energy

W hat is O man's green hydrogen for mobility station?

T he G reen H ydrogen for M obility S tation represents a step forward in O man's development of green hydrogen infrastructureand supports the nation's ambitions for a lower-carbon future.

H ow does O man's new hydrogen station work?

B uilt with electrolysis technology powered by solar energy, the station will produce up to 130 kg of green hydrogen per day.
I n addition to providing an alternative fuel source, it supports O man's V ision 2040 and N et Z ero 2050 goals by fostering low-carbon mobility solutions.

W hat is O man's first green hydrogen refueling station?

S trategically positioned near M uscat I nternational A irport, this state-of-the-art hydrogen refueling station is O man's first green hydrogen production facility, integrating hydrogen refueling, electric vehicle (EV) fast-charging, and conventional fueling options into a single hub.

H ow many hydrogen cars will O man airports have in 2022?

I n its first phase of the G reen H ydrogen for M obility, O man S hell signed an agreement with O man A irports M anagement C ompany in 2022 to give 15 hydrogen carsto O man A irports and to build a hydrogen station near the airport.

W ill hydrogen cars help O man achieve a more sustainable future?

T he introduction of hydrogen cars to our fleet and having a state-of-the-art hydrogen station set up near the premises of M uscat A irport will be a major step towards a more sustainable future for O man, in line with O man V ision 2040 and O man's N et Z ero by 2050 ambitions."

W hy is O man S hell introducing hydrogen-powered vehicles?

W ith the support of O man S hell, the introduction of 15 hydrogen-powered vehicles into our corporate fleet represents a step toward reducing emissionswhile delivering efficient and eco-friendly mobility services.
T hese vehicles will provide a seamless and sustainable travel experience, operated by skilled O mani drivers.
